News of Sports Day.

Everything is in readiness for the opening, at 1.30 o'clock this morning, of Stony's Dominion Day sports events. The various committees have done their work exceptionally well, and a good day's sport is assured us, providing the weather man is on his good behavior.

The steel torpedo netting in front of the new grand stand has just been completed, and patrons on the stand and bleachers are now assured they will not be injured by "foul" balls when games are in progress.

In the quiet interlude, at the close of the contests and before dancing starts, Stonyites are to have an opportunity to view the movie pictures depicting the scenes in connection with the Coronation of Their Majesties King George VI and Queen Elizabeth. These will be run off at Kelly's Hall, commencing at 6.30 p.m. These pictures are a special showing, and should be seen to be appreciated.

Schedule of Games.

Baseball—
10 a.m.—Stony Plain
versus Keep Hills
12 Noon—Arrow Buses
versus Brightbank
2 p.m.—Sage Grove
versus Onoway
4 p.m.—Winners of 2 o'clock
versus 10 o'clock winners
6 p.m. Final winners 12k draw
9 Winners 4k draw

Softball—
12 Noon—Walther League
versus Golden Spike
1.30 p.m.—Pleasant View
versus Graminia
3 p.m.—Onoway
versus Michael School

A Hill-climbing Tractor.

Tractor building has improved pretty considerable since the time almost two decades ago, when a farmer on taking his tractor out to the field to work, brought along a team and driver, to help his three-legged tractor back onto its feet again when the tractor toppled over on a side hill.

A demonstration of the newest type of tractor was given Friday up in Blueberry Hills, on the farm of John F. Fuhr.

No stronger evidence could be given than was seen that day, when it came to climbing the hills and maneuvering in the hollows of the workability of this new type of tractor.

This outfit was a John Deere tractor attached to a plow. During the demonstration, "breaking" a new furrow whilst climbing a hill proved easy work for the tractor and plow.

A goodly company of farmers was present, and appeared to be impressed by the performance given.

Duffield Sports Day, July 28.

The Duffield Community are, this year, holding their annual picnic and sports day on the above date. There will be 15 rounds of boxing and two wrestling bouts. Among those engaged in the wrestling will be contenders who have engaged in bouts at the Empire Theater, Edmonton.

A Great Menace

The automobile speed artist is a great menace on the highways but he is not the greatest source of danger to the lives and limbs of other users of the open roads.

The man who drives at night with one light ablaze and the other extinguished perhaps epitomizes the maximum peril on the highway, not only to himself and other occupants of the car he is piloting but to other drivers and the occupants of their automobiles. Certainly as a potential destroyer he ranks only second to the driver with liquor-laden breath.

The one-light driver is dangerous to the drivers and occupants of other cars whom he meets travelling in the opposite direction, because the "safety" driver is unable to tell whether the single light is on the right or the off side of the approaching car. If it happens to be the off side light that is burning the driver meeting him may be fooled and make insufficient allowance for clearance. The result is a terrific crash, serious injuries and perhaps death.

The natural instinct of the "safety" driver meeting a one-light car is to give the other fellow as wide a berth as possible, because of the uncertainty as to which side of the approaching car is lighted. But here, too, there is a risk that he may plunge into the ditch in his efforts to ensure adequate clearance.

Under any conditions the one-light driver is a danger to others as well as to himself, but particularly in this case when cars travelling in the same direction are passing one another with a single-lamp car approaching in the opposite direction.

Distances at night time are deceptive, even to the most experienced drivers. When both lights are burning it is not too easy to gauge the distance and speed of an approaching car. To many drivers the oncoming car from the opposite direction may appear a considerable distance away whereas it is actually close at hand and vice versa.

The only guide that one has as to distance and the speed of an automobile approaching at night time is the apparent distance between the two lamps and the rapidity with which this distance diverges as the car approaches.

At a considerable distance away the two lights of the approaching car appear to be practically merged into one. Observing this, the "safety" driver perceives that he has plenty of time to pass a car in front of him proceeding in the same direction and pull back on to the right side of the road before the car travelling in the opposite direction passes.

But, if instead of the approaching car being an automobile with two lights showing at a considerable distance away, it is a car with only one lamp alight close by and approaching at speed, the drivers and occupants of three cars are in deadly peril and through no fault of any person except the operator of the one-light car.

It is probably doubtful whether the operator of a one-light car has any conception of the risks he runs and of the peril that he is to other night travellers on the highway, or he would surely not embark on such a mad enterprise without first seeing to it that both lamps are in good working order.

If he does appreciate the risks that his defective lighting system entails and knows of their condition, then he can only be regarded as guilty of gross and culpable recklessness and should be dealt with in the light of such an indicting act.

There are occasions, no doubt, when one of a pair of headlights will become extinguished through a globe burning out, a short circuit or some other defect which has developed after the night journey has commenced. Under those circumstances the operator cannot be held as culpable as the driver who fares forth on a trip, knowing in advance that he can show only one light and who does not remedy the defect before darkness sets in.

Even the former, however, if he is as alert as he should be, should be able to perceive by the appearance of the beam on the road ahead of him that one of his lamps is not giving service.

The man with the glaring headlights on his car is a dangerous driver but the driver only showing one light is a still greater menace and the man who knowingly drives on the highway with only one lamp burning should be brought to book on every possible occasion and dealt with without compunction.

Such cases should be reported to the authorities by all travellers on the highway who have occasion to come in contact with them or to observe them and the law should be allowed to take its course without let or hindrance.

Until the driving public fully appreciate the seriousness of the offence and report every infraction which comes to their attention, the one-light driver will continue gallop on his way with death at his elbow ready to claim him and those whom he meets.

Enlarge Panama Canal

Plans Drafted For Work That Will Require Ten Years To Complete
Panama canal officials disclosed preliminary plans are being drafted to enlarge the "big ditch" at an estimated cost of \$150,000,000. A bigger canal, they said, will be necessary to take care of an expected increase in traffic.

It was emphasized that work on the plans would probably take 10 years. Another 10 years would be devoted to construction, and the proposed new locks would not be in operation before 1960. Installation of the new locks would cost approximately \$150,000,000.

Early lamp-picks were made of dried reeds or moss. In succeeding centuries they were made of flax or silk.

WILSON'S FLY PADS REALLY KILL

One pad kills flies all day and every day for 2 or 3 weeks. 3 pads in each packet. No spraying, no sickness, no bad odor. Ask your Druggist, Grocery or General Store.

Preserving Ancient Art

Work Of Indians Being Perpetuated In Saskatchewan, C.A.
Cameron Worcester, B.A., LL.B., of Saskatoon, is perpetuating in native clay ancient arts of the North American Indians and their contact with trail blazers of the old west.

The potter who is 29, and son of Prof. W. G. Worcester, head of the department of Ceramics, University of Saskatchewan, turned from law to study early art of the Redmen.

Young Worcester learned that Saskatchewan clays, which have not been used to any great extent, offer an ideal medium for the potter's art, and many fields are yet to be explored.

He has modelled heads of Sioux chiefs and Cree in headbands and warpaint, but most of his work is given to nature studies. He has found Indians preferred to draw animals and birds.

Scenery Can Be Enjoyed

View In Australia Is Not Blocked By Billboards

When Australians go motoring they can't without having their view blocked by billboards. In the state of Victoria alone, not a billboard is to be seen on 10,000 miles of highway. W. T. B. McCormack, chairman of the state's country roads board, said: "He has just completed a month's study of western Canadian and United States road systems."

A comet's tail always points away from the sun.

Rules Over Island

South African Pays Small Sum Yearly To Cover Lease

"Who would like to be king of a pleasant island set in sub-tropical seas... Lord of all he surveys down to the sands which are lapped by waves breaking in from the Pacific Ocean?" asks a writer in the Johannesburg Star. "And with the price of his throne only six pounds a year?"

Who would not? There is a South African who has achieved this. His name he wishes to keep, but anyone reading this who guesses it from his initials, A. T. A., is entitled to do so. For A. T. A. has gone out of the world as we know it and has bought one of his own.

It is a delightful world. Situated in the midst of coral-channelled seas, among other islands which are gems of sapphire set above white sands and fringed with blue waters, where the sun is a powerful filter and the moon a soft, tropical veil; in fact, where every prospect pleases exceedingly and even man is not so vile—the world of the Great Barrier Reef of Australia.

He has made an amazing purchase. Merely by paying the Australian Government £6 a year he has been given the lease of an island in Barrier Reef waters. For a little more than 28-a-week he has made himself a king. A. T. A.'s first "Royal" act has shown his appreciation of his bargain. Previously his island was marked on charts as Carlisle Island. Now, by a decree royal extra-ordinary, it is known as Paradise Island.

Attracts Many Tourists

Every Year Sees Increase In Parties Visiting Russia

More than 100 concerted tours from this continent will visit the Soviet Union this summer, according to Vladimir E. Pavlov, president of Intourist Inc., travel representatives for the U.S.S.R. A majority of the parties will make studies and observations of special phases of Soviet life, while others will go for general travel interest. Mr. Pavlov says the number of organized parties to the U.S.S.R. is increasing yearly.

Kulper: I am convinced that our baby looks like me.
Rattigan: I wanted to say the same thing, but I was afraid you would be offended.

BABY'S OWN SOAP

Best for You and Baby too

An Important Discovery

Glass Drinking Horns Used By Saxons 1,400 Years Ago

Glass drinking horns which were filled with mead to slake the Saxon thirst about 1,400 years ago have been unearthed in a sandpit between Rainham and Upminster, Essex, England.

G. T. Carter, a Romford archaeologist, who found the decorated curved horns, also unearthed relics of the stone, bronze and iron ages. Some of them are on exhibition at the British museum, where an official described them as "sensational."

"The horns are the finest ever found in this country," Mr. Carter said. "The discoveries are so important because they show that this tract of marsh and forest in South Essex has been in almost continuous human occupation."

"Hitherto there has been no evidence of Saxon life on the north bank of the Thames, and it was believed that the Britons held the north side of the estuary."

SELECTED RECIPES

NINE-DAY PICKLES

Wash four quarts of cucumbers and cut in generous pieces. Cover with strong brine for three days (¾ cup salt to 1 quart water); drain. Let stand in clear water for three days. Change the water daily. Drain; immerse in weak vinegar for three hours. Add a piece of alum the size of walnut after the first hour. Drain; put cucumbers in a crock. Make a syrup of:

3 pts. white wine vinegar
3 lbs. brown sugar
2 lb. can Crown Brand Corn Syrup
1 oz. whole allspice
1 oz. whole cinnamon
1 oz. celery seed
Pour the boiling syrup over the pickles and let stand for 24 hours. Drain; again bring syrup to boil and pour over pickles. Repeat for three consecutive days in all. Seal in sterile jars or use from the crock. Makes 6 pints.

Air Hero Penalties

Capt. Errol Boyd, first Canadian to fly the Atlantic, has fallen on evil days. The man who was commissioned as a general in the army at Haiti and has spent 7,200 hours in the air, has received an eviction order in his home town, Toronto. His furniture has been seized and he faces the prospect of soon being homeless, penniless with his wife and four daughters.

There are 1,100 kinds of animals and insects in the world, with thousands of varieties of each, it is estimated.

Annual Payment Due

Sixty Thousand Canadian Indians Will Get Treaty Money

Officials of the Indians Affairs branch of the department of mines and resources, travelling by air, canoe and on foot, will leave shortly for the isolated districts of Northern Canada for the annual distribution of treaty money to the Indians.

Aboriginal settlers who have been ceding their rights to the Dominion as frontiers push northward during the past 60 years, receive an annual gift of \$4 per head, and collection of this money is the big event of the year among the Indians.

Treaty Indians are found in parts of Ontario, and in Alberta, Saskatchewan, Manitoba, and the Northwest Territories but there are none in Quebec, the Maritime Provinces or British Columbia. They are those who themselves signed away their aboriginal rights to territory or direct descendants of treaty signers. Children of Indians marrying whites are not eligible.

There are about 112,000 Indians in Canada, and approximately 60,000 receive the \$4 per head treaty money annually. The Indian population is slowly increasing.

Cannot Supply Demand

Telephones Scarce In Japan So People Buy Them

There is a telephone shortage in Japan, the only country in the world where subscribers have to "buy" their telephones instead of renting them.

Every year the ministry of communications offers a certain number of telephones for sale. This year 55,000 were offered to the public and 787,549 applications were received.

The post office accepts ordinary applications for a telephone, but there is such a long waiting list that it may not be installed for years. So telephones are bought and sold through brokers at a high premium.

Some people find as much pleasure in whining about their misfortunes as other do in boasting of their good luck.

for BITES

Insect, snake, or animal bites. The best treatment is plenty of Minard's at once. It 30 soothes, heals and cleanses. Draws out the poison!

MINARD'S

FINE CUT

To Maintain Fertility Of Western Soils The Use Of Fertilizers Will Be Needed

The initial fertility of the western prairie soils has been demonstrated on many occasions by high yields of high quality wheat. The high yields have been more or less maintained in certain districts, while in others there has been a gradual decrease in yield which cannot be entirely attributed to a lack of moisture or competition from weeds.

The essential elements which the plants take from the soil in the largest quantities are nitrogen, phosphorus, calcium, magnesium, potassium, and sulphur. The other essential elements which are derived from the soil are generally present in amounts far in excess of the plants' needs. Plant growth, however, is not dependent on the total amount present, for the plant roots can absorb only the material dissolved in the soil moisture. Because of this fact, the productivity of a soil cannot be accurately gauged by the total amount of the essential elements present. Climatic and biological factors play an important role in changing the soil conditions from an unavailability to a soluble form.

The low precipitation of the prairie areas has prevented the loss, by leaching, of appreciable quantities of soluble salts. As a result, we find that the prairie soils contain large reserves of calcium, potassium, magnesium, and sulphur. It is doubtful if the application of these elements would have any beneficial effect on crop yields at the present time.

The nitrogen content of a soil is dependent on the amount of organic matter present. This is influenced by climatic conditions and vegetative cover. The low precipitation of the prairie areas has not promoted a rank vegetative growth, with the result that the soils are rather low in organic matter and nitrogen. These substances are found close to the surface, owing to the shallow root systems of the prairie grasses. The loss of surface soil by drifting often results in serious damage to the fertility of the land, because the upper layers contain the major portion of the nitrogen.

Phosphorus is more evenly distributed than nitrogen at the different depths in the soil. There is a certain amount of variation for the soil layers containing the most organic matter also contain the most phosphorus, as the plant roots absorb phosphorus at various depths and concentrate it in the plant. When the plant dies, this material is deposited on the surface where it accumulates or is carried into the soil after decomposition takes place. Phosphorus is not required in very large amounts by the cereals, but as it generally occurs in the soil in only slightly soluble, the plant may have difficulty in securing an adequate amount for maximum development, even when the soil contains a comparatively high concentration. A deficiency of any one of the essential elements will have a very pronounced effect on plant growth, even when the other essential elements are present in adequate concentration.

The heavier soils generally contain more nitrogen and phosphorus than the lighter soils. This fact is reflected in the greater productivity of the clay and clay loam soils when compared with the light sandy soils in areas of equal precipitation.

The use of commercial fertilizers on the prairie soils has gradually increased during the past few years. This is to be expected, for agricultural history shows that any land which is cropped more or less continuously, eventually reaches a condition when fertilizers are needed. The initial fertility of the prairie soils has prolonged the period during which the application of fertilizers was not economical. Years of low rainfall and low yield have also tended to conserve the supply of plant nutrients. During a year of adequate or high rainfall, the prairie soils that have been cropped for 20 years or more would likely give an increased yield if supplied with an additional amount of nitrogen and phosphorus. During the drier years, it is doubtful if such would be the case, for there might not be sufficient moisture to carry any increased plant growth.

It is logical to expect that as time goes on and the amount of available plant food in the soil gradually becomes less, the use of fertilizers will become more general. The prairie soils, though having a high initial productive capacity, are not inexhaustible, and if farmed continuously will eventually need applications of plant nutrients in some form if profitable crops are to be produced.

Home Canned Berries

Raw Canning Method Can Be Used Successfully

As the berry season advances, the housewife is all anticipation, for there is nothing more satisfying to her than the knowledge that in this good berry year there will be a fine array of different kinds of berries on her well-stocked pantry shelf of home-canned fruit and vegetables. The berry family is an efficient source of vitamins. Blackberries contain vitamin A, which is essential to the growth of youth; and currants, gooseberries, and raspberries are excellent sources of vitamin C which prevents scurvy.

No equipment for canning is necessary other than that found in the ordinary kitchen—sharp knives (preferably of stainless steel), a colander, bowls, measuring cups, enamel plate, wooden spoons, a wide-mouthed funnel for filling jars, and a jar lifter to save burned fingers when taking jars from the sterilizer. The sterilizer itself may be the common wash boiler, the steam pressure cooker, or the oven. Strawberries, raspberries, and rhubarb may be canned successfully by what is known as the raw canning method. Pack in jars; cover with boiling syrup; place on newspaper in a tub and pour boiling water into the tub over the jars three inches over the top. Place a blanket or rug over the tub and leave until cold. In pouring the boiling water into the tub, care should be taken not to pour directly on the jars.

In the process of sterilizing the berries, there is a choice of one of four methods, namely, hot water bath at 212 degrees Fahrenheit; steam pressure of five pounds; oven, or steam cooker. For blackberries and blueberries the time is 20 minutes in the hot bath; or ten minutes of 5-lb. steam pressure; or 35 minutes in the oven at 275 degrees Fahrenheit, or 30 minutes in the steam cooker. For raspberries require 10 minutes in the hot bath, or ten minutes steam pressure or 30 minutes in the oven, or 25 minutes in the steam cooker. The same times apply to strawberries, and strawberries require 35 minutes in the oven.

Full information as to the canning of fruits and vegetables will be found in the household bulletin "Canning Fruits and Vegetables" which may be obtained free on application from the Publicity and Extension Branch, Dominion Department of Agriculture, Ottawa.

Queen Mary's Private Life

Is Not Fashioned On Dignity Required In Public

Though no Royal lady ever bore herself with greater dignity when occasion requires. Queen Mary, to whom the Empire's affectionate greetings have gone on her 70th anniversary, has no living for rigid etiquette in private life.

There is a story of a housemaid, just promoted to the upper regions of Buckingham Palace, being taken aback on hearing whistling in the corridor leading to Queen Mary's bedroom.

She was still more astonished on discovering that the whistler was the Queen herself.

As all who come in contact with her know, the Queen Mother has a keen sense of humour and a gift of genuine laughter.

It was Keir Hardie—no flatterer of Royalty—who once declared that Her Majesty was the most cheerful laugh he had ever heard.—News of the World.

The invention of half-tone engraving revolutionized the advertising art.

National Parks In Western Canada

Twelve Thousand Square Miles Set Aside As Playgrounds

To the Canadian Rockies and other scenic areas of Canada's great West come thousands of tourists each year from all parts of the world to enjoy the exceptional opportunities offered for rest and recreation. In these vast regions the Government of Canada has set aside in National Parks more than 12,000 square miles as playgrounds where all may sojourn close to nature but with the comforts and amenities of modern civilization. It is one of the chief charms of the Rockies that one may travel through the very heart of the region by luxurious trains or motor cars and find accommodation to suit almost every pocket-book, yet half an hour's walk from the railway or motor road Nature is found as wild, as solitary and as beautiful as it was a century ago.

There are thirteen National Parks in Western Canada, nine of which are parks and four animal parks. Like the recreational and historic parks situated in the eastern part of the Dominion, they are administered by the National Park Bureau of the Lands, Parks and Forests Branch of the Department of Mines and Resources. Eternal vigilance is exercised to preserve the beauty and grandeur of the forests from the dangers of fire, and to safeguard the rich heritage of wild life within the park boundaries. By the construction of good roads and the provision of other modern conveniences of travel, not only is the purpose for which the National Parks were set aside being realized, but the greatest possible enjoyment of these great natural treasure houses is afforded both the citizens of Canada and the visitors within her gates.

With the exception of Glacier National Park, on the summit of the Selkirk range in southeastern British Columbia, reached only by rail, all National Parks in Western Canada are accessible by automobile.

Descendant Of Confucius

Chinese Girl Says Orient Is Adopting Western Customs

Miss Rosemond Kung, direct descendant of Confucius, rugged, European-dressed, is in London from China. Her father is Minister of Finance, Vice-President of the Executive Yuan.

Her lovely aunt at Grosvenor House is heavy with oriental perfume. Miss Kung looks like a delicate Chinese doll, talks like a girl getting, up-to-the-minute American colloquial that she is.

She said to me: "I love London. For once, in the Western civilization, I've found something that compares with Old China, the China which I've phased background and good breeding and respect."

"Shanghai is a daring mixture of Eastern and Western customs. We girls go in for law, medicine, aviation, banking and politics. I love and then came the silver lining and the job was finished."

Dominion Proposals For Joint Youth Training Plan With Aid Of Provinces

Home Safety Education

Problem In Connection With Prevention Of Accidents

If a proper understanding has to be reached of the educational problem in connection with prevention of accidents in the home, more attention will have to be paid to the psychology of the general indifference to home safety education, Dr. N. L. Burnette, Ottawa, told the convention of the Canadian Public Health Association.

Dr. Burnette's observations related to a paper presented by Miss Yvonne Baudry, of the vital statistics branch of the Dominion bureau of statistics. The document covered the circumstances of accidental deaths in Canada in 1936. Marked differences between the sexes in the incidence of accidental deaths were noted, said Miss Baudry. Moreover, each period of life had certain forms which characterized it more than any other. An important class in the death of infants was that of suffocation by overlying. Between the first and fifth years, children were exposed to dangers from burns and scalds, to drownings in the course of their play and to vehicular accidents. These latter occurred owing to the child's lack of sense of danger and perhaps the carelessness of those who should have guarded them," said Miss Baudry.

Boys had a larger mortality rate from accidents than girls between the fifth and 15th birthdays, owing to their greater recklessness and the more hazardous activities in which they engaged. In adult life industrial accidents played a considerable part, as well as traffic accidents and drownings.

Finally, old age deaths occurred, which had to be attributed to violence, but in which the fragility of the decedent was largely responsible.

Works With Mirror

Toronto Dentist Pulls And Fills His Own Teeth

Dr. S. M. R., Toronto, (he would not permit any more of his name to be used), knows what it is to hear himself say, "This will hurt just a little." For the dentist pulls and fills his own teeth. "It's all done with mirrors," he explained. "It was a little awkward at first—especially with back molars. But I think I can make as good a job of my own teeth as any other dentist. It's cheaper, too. I have been doing my own work for years!"

Dr. S. M. R. paused to grind at his tooth, keeping his eyes on his work by means of a mirror on a cabinet. A clean, neat "crow's foot" and then came the silver filing and the job was finished.

Embroider Her in Wool or Silk

Household Arts by Alice Brooks

She Does Entirely in Single Stitch

PATTERN 5905

Such a cuddly, cozy pussy-cat! Can't you just picture her peeping on a soft pillow, or living up a picture for the kiddies' room? Stitch her fluffy outlines in woolly yarn or angora, and see how lifelike Miss Fuss appears! A charming motif that "goes" very quickly, and is grand as a bit of pick-up work for odd moments. Send for the easy pattern, and plan your color scheme to-day! In pattern 5905 you will find a transfer pattern of a cat 9 1/2 x 12 1/2 inches; a color chart and key; material requirements; illustrations of all stitches used.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 179 McDermott Ave. W., Winnipeg.

There is no Alice Brooks pattern book published

Cow Takes Prize

Captures Ayrshire Breeders' Association Meritorious Production Gold Medal Certificate

Picken's Patty, an Ayrshire cow owned by the Consolidated Mining and Smelting Company of Canada, at Trail, B.C., has won the 18th Canadian Ayrshire Breeders' Association meritorious production gold medal certificate for cows giving more than 100,000 pounds of milk during the lifetime production, it was announced.

The cow, also awarded the 18th Canadian membership in the select Hundred Thousand Pound Club of the American Ayrshire Breeders' Association, has produced 106,222 pounds of milk, 4,239 pounds butterfat in six lactations, or 2,130 milking days. Her average production was 17,736 pounds milk, 706 pounds butterfat per lactation, "a really remarkable record and any cow," the association announcement said.

China's First Paper Mill

China's first paper mill and wood pulp plant combined has just been opened near Canton. It was designed, constructed and equipped by Swedish architects, engineers, and manufacturers. A Swedish engineer and two Swedish foremen, head the mill, but the workers are all Chinese.

WORLD HAPPENINGS BRIEFLY TOLD

An earthquake which witnesses said cracked strong walls and turned crosses on church bellies shook the coast of Peru recently.

Russian Cosacks, former members of the White-Russian armies, who took refuge in the Central European countries, have organized a circus troupe to earn a living.

The United States agriculture department estimated world wheat production, exclusively of Russia and China, would increase approximately 300,000,000 bushels over last year's output.

Toronto city council approved a proposal calling for daylight delivery of milk. Under the new bylaw no milk shall be delivered between 7 p.m. and 6:30 a.m. of the next day between Oct. 1 and May 1.

The silver mace of the old Irish House of Commons was sold at auction in London for \$13,100 (\$15,345). L. C. Honham, acting for a Dublin bank, was the successful bidder. In the auction held at Christie's.

The Duke of Kent saw his great-grandmother portrayed on the stage when he and the duchess attended the first performance in England of Laurence Houseman's "Victoria Regina." Pamela Stanley portrayed the queen.

No daily flights with both passengers and mail will be made on the Trans-Canada airway until 1933. J. A. Wilson, controller of civil aviation, announced at a luncheon meeting of the Canadian Flying Clubs Association, held in Regina.

Sir John Simon, chancellor of the exchequer, announced to the House of Commons Great Britain does not intend to re-open war debt discussions with the United States in connection with pending proposals for an Anglo-American trade agreement.

Prevention Of Silicosis

A Possible Remedy For Costly Industrial Disease
Possible prevention of silicosis, costly industrial disease, was seen in research work done at the Banting Institute and the McIntyre mine at Schumacher, Ont.

A brief statement by the Academy of Medicine of Toronto, prior to later official publication on the details of the research accomplished, said "it represents the most outstanding contribution in the history of silicosis research."

Doctors at the Banting institute were reported to have found metallic aluminum particles protected rabbits' lungs from injury from quartz dust inhaled by the animals.

Lighting Bill Higher

Failure Of Moon Makes Hebrides Town Council Mad
The town council of Stormoway, The Hebrides, is mad at the moon. It hasn't shone lately, so the street lighting bill is up 10 per cent.

Careful of their spouses, the Scots turn the street lights out when the moon shines bright on these northern islands.

Now the entire Hebrides are throbbing to the following official announcement:

"The bad weather has deprived us of the use of the moon practically throughout the season."

Supply Exceeded Demand

Bride Worried Because Ice Cubes Froze Too Fast

A frantic bride called the Rochester Gas and Electric Corporation to complain that her new refrigerator "freezes ice cubes too fast."

Jack Sharkey, sales supervisor, said an electrician rushed to the scene and found ice cubes piled in every available pan, scattered all over the kitchen floor.

"I thought you had to take them out as soon as they froze," the bride told the electrician.

Britain's wealth is estimated to be \$40,000,000,000. The average man's share is represented by the last 10 figures.

Very few of us can long bear up under the crushing weight of luxury.

A sponger is a fellow with a proposition that won't hold water.

Paper Changes Hands

Amalgamation Of Daily Newspapers In Quebec City
Change of ownership of the Quebec Chronicle-Telegraph, evening daily newspaper, from Hon. Frank Carrel, M.L.C., to "a syndicate of local businessmen" is announced.

The announcement, published in the Chronicle-Telegraph, says this paper will hereafter be published with the Quebec News, a daily paper which ceased publication on May 29. The name of the merged papers will be the Quebec Chronicle-Telegraph, Quebec News and Quebec Gazette, representing amalgamations in the local English newspaper field since the founding of the Gazette in 1764. Hon. Frank Carrel is a veteran Canadian newspaperman and has been an active journalist and publisher for 25 years. He inherited the Quebec Telegraph from his father, James Carrel, its founder. Mr. Carrel was born in Quebec in 1870 and was called to the Quebec legislative council in 1918.

Study Rheumatism

Survey Of Disease Carried Out By Department Of National Health

A survey of rheumatic disease in Canada has been carried out by the department of national health working in co-operation with an insurance company. Dr. R. E. Wodehouse, deputy minister, told a meeting of the Canadian Public Health Association. The results of the survey will be published later.

"This survey has given us some definite information on the per cent of rheumatism by age and sex, the type of rheumatic disease by age and sex and the seasonal variety of the disease by severity," Dr. Wodehouse said.

"We believe the results will materially aid first the Canadian Rheumatic Disease Association and eventually the private practitioner in estimating various kinds of rheumatism."

Idea Did Not Work

A confectioner in Belgrade left his dog to guard the house when he went to lunch. When he returned, he saw a huge crowd gathered in front of his locked front door, gazing in at the window. They were watching a dog devouring box after box of chocolate. It was the watchdog.

Lloyd George To Sell Home

David Lloyd George has offered for sale his London home, Dwyfor House, Kensington. Now that he spends most of his time at Churt, Surrey, he finds Dwyfor House too large. When in London in future he will reside in a modern service flat.

The state of Florida has 3,761 miles of tidal coast line.

Those with nothing to say usually take too long to say it.

MAKE THIS MODEL AT HOME— BUTTONS ENHANCE ITS CHIC!

By Anne Adams

"Where there are bright buttons there's chic," says Anne Adams, and one look at Pattern 4444 will convince you that, as always, she's up on her toes when it comes to designing you cheery sports frocks that may be worn when you're "sporting," or are fashion-right for porch and garden wear, too. Just see the graceful princess lines of this button-front style—ever so becoming to your figure, and simple to stitch up! Nobby buttons adorn the brief sleeves, and pert revers also contribute their share of flattery. For fabric, why not choose seersucker, shantung, or a crisp cotton?

Pattern 4444 is available in misses' and women's sizes 14, 16, 18, 20, 22, 24, 26, 28, 30, 32 and 34. Size 16 takes 4½ yards 36 inch fabric. Illustrated Step-by-Step Sewing Instructions included.

Send twenty cents (20c) in coin or stamps (coin preferred) for this Anne Adams pattern. Write plainly: Name, Address and Style Number, and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

"Well, here's the same tramp I gave some pie to yesterday!" "Ah," said her husband, "they're hardened, these tramps."

Asia seems a long way off, but it's only thirty-six miles from North America—across the Behring Strait.

New Zealand has the lowest infant mortality rate of any country.

THE CANADIAN ADVENTURE TRIP OF BOB SIM, AN ONTARIO FARM BOY

No. 4 of a Series of 16 Letters

At least Bob is getting new visions—a new idea of Canada—Why people do not travel over more of this beautiful country of ours—East, West and North, instead of rushing away from it to "see something different" has always puzzled your editor. There's lots of variety in Canada—entirely different methods of life, scenery, foods, to where you are. Distance is the one big obstacle but—"see Canada first!" is our suggestion to readers. Well—here's Bob's story!

Baddeck, Cape Breton, Nova Scotia. (Special Despatch by Bob Sim.)—After going east for two weeks I came to the end of land on the east-most shore of Cape Breton Island. As you look east there is nothing between you and Lisbon or Liverpool—nothing but salt water. But there is, let me add a powerful lot of that.

Cape Breton is an island; once a province, separate from Nova Scotia, once a French military base; now an important industrial centre with a large farming and fishing population. I might discourage any young man who thinks of coming here to sell magazines or vacuum cleaners unless he can speak Gaelic and French as well as English. The Acadian people are here, the remnant of the French colony of 17th century, with a civilization and language quite unlike that of the Highland Scotch came later, bringing with them oatmeal, scones, bagpipes, Gaelic and a love for green glens. They have been here for many generations but numbers of them cannot speak English. Even the local radio stations have Gaelic programs. Perhaps you have heard the Côtter's Saturday Night N.C. network, which originates in Cape Breton.

Prof. A. B. MacDonald and a friend and their way on the island. The friend questioned an old Gaelic lady but made little of her. He got the Gaelic name of the old lady said, referring to the Gaelic "And did you never learn the Gaelic?" "Gaelic?" "What a way to bring a child up!"

The Co-operative Wild-Fire
Co-operation of various forms, as you know, has been attempted in all parts of the world. Sometimes it has succeeded, elsewhere it has failed. One of my earliest recollections, as a child, was of the fire of what grove-growers' organizations, which later grew into the monumental wheat pools of Canada. Later I can remember the growth of co-operatives in Ontario in the 1920's. As I promised last week I will tell you something about the co-operatives of Nova Scotia which have attracted so much attention.

Must deal briefly with the matter here. For those who are interested, I will mention two articles which appear shortly in the Farmer Magazine, on this subject. "You can't save a man's soul if he hasn't two hens and a shirt." This was the sentiment of the University of St. Francis Xavier, Antigonish, St. F. X., as it is called, is in northern Nova Scotia, where the depression was I should judge, much more severe than in Ontario or Quebec. The college authorities saw great suffering about them; in addition they felt that the boys were, as an educational institution, serving a privileged class, namely those who could afford to attend college.

The beginning came in a village on the Atlantic coast. The people who fished for a living—lobster chiefly—became deeply indebted to the local lobster factory. Their boats, fishing tackle, homes, even their clothes, were mortgaged at 12½ interest. As a result they simply fished for the factory without wages, year in and year out. The fishermen began to study co-operatives, and finally organized a co-operative lobster plant. In the first year they paid for the plant, and distributed \$10,000 to themselves.

But the main object, the vital aspect, is not in adding to one's income. It is the spiritual life that is released to a people who have caught a vision of a new freedom. A freedom primarily intellectual and spiritual, secondarily economic. I have witnessed here in Nova Scotia the beginning of a movement that will sweep Canada as it is sweeping the United States. It is the departure from relief and pauperism, a poison to this generation, to an order of self-help and intellectual growth, of spiritual integrity. The key to the movement is study, organization, and, as one leader has put it—"on finding your lobster." It is spreading like wildfire; it is spreading among the people that matter, the common people they are called; the workers, the farmers, the fishermen.

Odds And Ends

To-day I leave for the south of Nova Scotia. This part of the trip will include Halifax, the Annapolis Valley, and an Acadian community. This will take me finally to Digby, where I will take the boat across the Bay of Fundy to St. John, New Brunswick. Northern Nova Scotia is characterized by its suitability for tourist.

trade. Much of the land is not suitable for industry or agriculture. This is the area of the greatest rural depopulation in Canada; about 60% in 60 years, although only one-fourth of the land is not far behind with 48% in the same time. Most of the families are dependent on one or two means of livelihood. They may have a farm, do some fishing, cut pulpwood in the winter, while some of the boys may be in the mines. There are better places to hitch-hike than Cape Breton; the trip is light at this time. In a month there will be more American cars on the road than Canadian.

SUNDAY SCHOOL LESSON

JULY 4

GOD HEARS A PEOPLE'S CRY

Golden text: Before they call, I will answer; and while they are yet speaking, I will hear. Isaiah 65:24.
Lesson: Exodus 1:1-22; 2:23-25.
Devotional reading: Psalm 42:1-5.

Explanations And Comments

The Israelites Increase In Numbers, Exodus 1:1, 7. The settlement in Egypt brought prosperity for a time. "The calm years glided on and the shepherds in Goshen had the happiness of having no annals. All that needed to be recorded was that Joseph and his brethren and all that generation died, and that new generations of the children of Israel" increased abundantly, and multiplied, and waxed exceedingly mighty; and the land was filled with them."

"The ethnic name of the descendants of Jacob was 'Hebrews.' The children of Israel, or 'Israelites,' was a religious designation; and it is used here, as the writer is beginning to relate the national history of that people who were separated from the general mass of the world by the knowledge and to the worship of God" (Robert Jamieson).

Pharaoh's Children In Israel were Oppressed In Egypt, 1:8-10. "Things pass away like a tale that is told," exclaimed the sage in "Oxford Shop." The tale of Joseph is ended, the time of royal favor for the Israelites is past, and long past, and descendants, "as the sand of the sea in numbers," are oppressed and afflicted. A Pharaoh is now on the throne of Egypt who although he may have heard about Joseph and his services, he "knows not" Joseph in the essential sense of not acknowledging his authority or influence.

With the new king a new policy was inaugurated. Ramesses I, who is called in the Bible "Rameses," Pharaoh, said to his people, "Behold, the people of the children of Israel are multiplying exceedingly, and we are afflicted by them. Let us deal wisely (afterward) with them, lest they multiply," counsels to Pharaoh, fearing that if Egypt were attacked by foes from the east, the Israelites, who were in the eastern frontier, might ally themselves with the invaders and finally "get them up out of the land."

The Israelites Oppressed, verses 11-14. Therefore Egyptians set over them taskmasters to afflict them with their burdens. And the Israelites built for Pharaoh store-cities, Pithom and Raamses. The cruel tasks had the opposite effect of that desired—the greater the affliction, the more the Israelites increased in numbers. **God Hears A People's Cry**, Exodus 2:23-25. The king died, but no relief came for his eyes fairly bulged. "Hebeph" he remonstrated with his wife, "who'd a thought of that thing having a colt?"

And God saw the children of Israel, and God took knowledge of them.

Making Permanent Records

Toronto Library Plans To Photograph Newspapers For Files

Because newspapers being handled will not last more than 75 years, Toronto Library is planning to have each record photographed so they will last forever. C. R. Sanderson, chief librarian, explained citizens of the future will be able to see back files will be able to go to a booth and see the page or edition they desire projected on a screen. Each page of the newspaper will be filmed on 16 mm or 35 mm film and a forty-page paper will be photographed on five feet of film. Three or four weeks' newspapers will be placed on 100 feet of film. The system would permit many savings, the librarian stated.

Greatly Surprised

Not so long ago motor cars in some parts of Ireland were few and far between. An old farmer was astonished when he saw one gliding along the road without any visible means of locomotion; but when a motor bike followed it round a bend in the road his eyes fairly bulged. "Hebeph" he remonstrated with his wife, "who'd a thought of that thing having a colt?"

TRIBUTE PAID TO GOOD WORK OF MEDICAL SCIENCE

Ottawa.—"The true life-saver," Lord Tweedsmuir told the Canadian and Ontario Medical Associations, "are the doctors and not the patients."

The governor-general paid a brief visit to the capital to be guest of honor at a luncheon of the two medical bodies.

"Supposing we had tomorrow universal peace assured for all time," he said, "there would be no real security for human life." His Excellency declared that "to-day every sane man must be a devotee of peace, for most of us, except the very young, have had personal knowledge of the terrible consequences of war."

"Heaven forbid that I should minimize these terrors; the best guarantee of peace is that the world should remember them. But great though the toll of war is, if you will look back through history you will find that the toll of disease is far greater."

The governor-general told his audience "in history we find that the loss of life by plague has also been infinitely greater than the loss on the battlefield. The plague in Athens devastated her far more than the Peloponnesian war. In the Crusades it was not the deaths on the field that depopulated Europe, but the plague which was brought back from the east."

Despite medicine's triumphs, he declared, new problems have arisen. He instanced yellow fever, confined at the moment to West Africa. "If, through modern communications, it should reach East Africa and spread thence to India and the Far East, we might have a repetition on a far greater scale of the plagues of the middle ages," he declared.

There remained too the fight against one or two major diseases, he added, mentioning cancer and rheumatic diseases. The governor-general recalled Canada has produced outstanding figures in medical science but paid tribute not only to those "we might call the grandees of the profession" but also to those "ordinary doctors" who throughout Canada are performing faithfully the most arduous duties in the face of great difficulties and for very little reward.

Would Fly To Moscow

James Mattern Plans Flight From California To Russia

Oakland, Calif.—Plans for a non-stop refueling flight from Oakland to Moscow were announced by James Mattern, noted aviator, who said he would follow the route taken by the three Soviet airmen who flew from the Russian capital to Vancouver, Washington.

Mattern said M. L. Benedict, Pittsburgh, Pa., oil man, had backed him in acquisition of a \$90,000 plane which he would take from Burbank, Calif., to Oakland in the initial test flight.

In 1933 Mattern flew from New York to Norway on a projected world flight but cracked up later in Siberia where he was rescued by Soviet airmen.

Members Get Increase

London.—The House of Commons approved a measure increasing salaries of members from the present £400 (almost \$2,000) annually to £600. The vote was 325 to 17 after an amendment that the increase be not effective until after the next general election was rejected 326 to 31.

Believed To Be Record

Chester, N.S.—Kenneth Knapp, 17-year-old Norwalk, Conn., youth, established what was said here to be a fly-casting record for Canada, when he cast a distance of 134 feet with a 54-ounce rod. The cast was made at the Owl's Head Rod and Gun Club competition.

Delegates Divided

Geneva.—With Canadian delegates splitting on the question, the international labor conference adopted a resolution recommending a 40-hour week in the textile industry.

Work On Ontario Farms

Opportunity For Unemployed To Help Harvest Bumper Crop

Toronto.—Sounding a warning Ontario's prospective bumper crop might be needed in the event of a European war, Premier Hepburn launched a campaign to put unemployed men to work on Ontario farms.

"We have the most bountiful crop in our history," the premier said, "it is absolutely imperative that we take full advantage of it and handle it properly because with an acute feed shortage in the west and the possibility of a European war becoming more and more acute, the North American continent in the near future may be the only continent that can be turned to for food supplies."

All employable married men now registered and receiving relief will be able, under the plan, to accept farm work without having to account for the money they earn so long as they retain it for the use of themselves and their families. While the men will be struck from the relief rolls while engaged on farm work, their families will still be maintained on relief. No man's absence from his municipality will affect his legal residence.

The government will pay transportation of men from their present home to the farm jobs. The jobs, as last year, will be open to single men as well and every effort will be made to encourage the single man to go on to the farm.

To date, the premier said, 4,055 farm placements have been made by the government. Indicating the demand, however, the premier said in the Toronto office alone there are 105 unfilled placements.

To Investigate Planes

Air Worthiness Of One Type To Receive Attention

Ottawa.—Pending an investigation, certificates of air-worthiness for all planes of the same type as the one that crashed at St. Marys, Ont., June 21, with the loss of three lives, have been suspended, it was announced by Transport Minister C. D. Howe.

There are 11 planes of the type in Canada, eight in commercial work. The suspension will ground all planes with commercial licenses and the department will serve notice on private owners it accepts no responsibility for their safety.

In making the announcement, the minister said: "A number of accidents involving this type of aeroplane have occurred in different parts of the world, including two in Canada, in recent years and, in the interests of public safety, a thorough investigation into the cause of the accident is being conducted. As soon as the findings of the technical officers in the department of transport are presented, a decision regarding the general airworthiness of these aircraft will be given."

The crash at St. Marys, Ont., took three lives, Arthur Leavens, Alfred Ogden and Charles Sockett, all from Toronto.

Bubonic Plague Spreading

New Type Attacking Animals In Western United States

Denver.—Rapid spread of bubonic plague, diagnosed in a new form among animals in the western United States, with a prediction it may go to the Ohio river and Canada and be very dangerous to man, was reported to the American Association for the advancement of Science here.

The warning was given by C. R. Eakey, senior surgeon, United States public health service, San Francisco. The new form is called sylvatic plague.

Rain Ruined Cherry Crop

Niagara Falls, Ont.—Example of the damage caused by rains was seen at the orchard of C. Howard Fisher, Queenston. Rain ruined his entire crop of early sweet cherries, valued at \$1,500. Fisher and a gang of men went out to salvage some but the cherries had rotted on the trees.

Non-Intervention Note

Rome.—Italian planes in Spain have downed 318 Spanish government aircraft. It was officially claimed here, in a communique. 2209

J. F. SINGLETON

Dairy and Cold Storage Commissioner with the Dominion Department of Agriculture, who will represent Canada at the Eleventh World's Dairy Congress to be held in Berlin, Germany, August 22nd to 28th.

Treat Wheat For Smut

Ontario Farmers Are Using The Hot Water Treatment

Chatham, Ont.—The first experiment in producing smut-free wheat seed on a commercial basis in Ontario is being attempted on four Kent county farms. The experiment is expected to prove also that hot water treatment will not damage the vitality of grain or kill germination.

The apparatus for the hot water treatment of seed was installed last fall. Four farmers subjected their grain for the treatment. In bushels it was kept in hot water at varying degrees for different periods. The treated seed was sown and the wheat is now five feet high. Cutting should start in about three weeks.

The experiment has been conducted in collaboration with Ontario agricultural department and officials of the Ontario Agricultural College at Guelph.

Feed Situation Serious

Edmonton.—Warning Alberta farmers to do "everything possible" to provide feed necessary for their stock during the coming winter, Hon. D. B. Mullen, minister of agriculture, in a statement issued here said the situation was beginning to look "very serious."

Stock Not Saleable

Bilbao, Spain.—Most retail stores here were closed simply because there was nothing to sell. But one was open with shelves loaded—and drew no customers, as the only stock available was thousands of boxes of toothpicks.

Shoot Arab Workmen

Jerusalem.—Two Arab workmen were shot and gravely wounded as they passed through the Jewish quarter.

THE KENTS ATTEND THEATRICAL GARDEN PARTY

The Duke and Duchess of Kent, accompanied by Noel Coward, England's most famous young playwright and actor, arrive at the Theatrical Garden Party at Regents Park, London.

Health Rules For Trailers

Uniform Regulations Throughout Canada To Apply

Ottawa.—Uniform regulations throughout Canada relating to automobile trailers have been adopted by the health departments of all provinces, it was indicated by officials of the national health department here. In general the regulations already effective in Manitoba have been approved by the other provinces.

For the most part the regulations deal with sanitation.

These set forth that closets of automobile trailers must be of the removable receptacle type, fly-proof, provided with satisfactory means for ventilation and of such construction as will permit of proper cleansing and disinfecting. Containers must be regularly treated with disinfectant or deodorant.

Sinks must have removable, watertight metal containers for retention of all liquid waste.

Discharge of liquid or solid waste on to the ground is prohibited. All waste must be emptied into sewage pipes or disposed of by other approved methods.

Tourist camps where trailers park must bury or burn solid and liquid waste for trailers. Conveniences of these travelling houses must not be used when the trailers are parked in camps.

It is prohibited to live permanently in a trailer within the limits of any city, town or municipality, except within provisions of local bylaws and regulations. All automobile trailers and their occupants are subject to provisions of regulations respecting disease control, under the Public Health Act.

Mine Officials Criticized

Coroner's Jury Finds Laxity In Judgment Caused Disaster

Nanaimo, B.C.—A coroner's jury ended two days of investigation into the June 11 flooding of the Behn mine at nearby Enderby, B.C., and returned a verdict criticizing mine officials and mine inspectors for laxity in practical judgment. Three miners were drowned and two others were rescued when water broke through into the mine from the adjoining and now abandoned Extension workings.

After noting Joe and Nelson Shepherd and Joe Carr died from drowning, the verdict said:

"We find that no precaution had been taken in boring ahead in No. 4 level on the face of the slope."

"It was also found that one hole had been drilled on the left rib of No. 3 level close to the face."

Old Law Not Repealed

Kingsville, Ont.—A 1901 unreppealed bylaw of this Essex county town provides a \$50 fine for anyone shouting or singing in the streets. Speed of more than eight miles an hour is also banned.

RAPID ADVANCE OF INSURGENTS IN BILBAO AREA

Portugalete, Spain.—The insurgent tide has rolled westward from Bilbao toward Santander, last important city held by the Basques. Artillery thundered in the hills. Five columns of infantrymen moved out of the Bilbao region on roads leading toward Santander.

Insurgents captured Portugalete, industrial town and last foothold of Basques along the Nervion estuary linking fallen Bilbao to the sea.

So powerful was the new insurgent advance that officers expected to conquer Valmaseda, first main objective, within two days. Valmaseda is west and south of Bilbao, about a third of the distance to Santander.

Portugalete was a rich prize. The town is jammed with factories, smelters and coal and iron ore deposits. Its wharves were lined with tugs, freighters and barges.

Government troops held out until the very last. They dynamited a bridge linking Portugalete with Las Arenas, across the estuary. A number of buildings were burned and much of the population was evacuated.

Bread finally became plentiful in Bilbao. The city rapidly was approaching normality with radios blaring, street cars running and business houses opening their doors.

Tuberculosis Control

Campaign To Combat This Disease Among Indians

Ottawa.—A campaign to combat tuberculosis among Indians was mapped out here by a committee representing the federal Indian affairs branch and the Canadian Tuberculosis Association. It will be recommended to the government for action. The rate of tuberculosis among Indians is 10 times as great as among white men in Canada and the committee recommended stringent control methods.

The government will be advised to examine all children in Indian residential and day schools. Pupils found to have active tuberculosis would be removed to sanatoria for treatment.

Other recommendations were: Establishment of special schools where pupils found to have early and minimal tuberculosis might receive special care and attention with a view to their return to normal school routine within two years.

Health education to be made a major subject on the curriculum of all Indian schools.

Eradication of tuberculosis in cattle supplying milk to Indian schools.

Chairman of the committee was Dr. R. L. Stott, of the Indian branch, and the others included were Dr. A. L. McQuarrie, Vancouver; Dr. A. B. Simes, Fort Saskatchewan, Sask.; Dr. T. F. Murray, Sarcee, Alta.

To Remain Leader

Reported Rt. Hon. R. B. Bennett Will Retain Leadership Of Conservative Party

Ottawa.—The Ottawa Journal in a news page story says:

"Rt. Hon. R. B. Bennett, leader of the opposition, is expected to announce on his return to Ottawa next month that eminent European physicians pronounce him particularly fit and well, and he will remain in the leadership of the Conservative party."

"Tentative plans were arranged before the close of the last session of parliament for Mr. Bennett to meet his followers in the House of Commons in Ottawa in July. His decision on his future plans would be disclosed to them."

Long Bicycle Race

Melbourne.—English, German, French and Belgian riders will be invited to compete in a 1,000-mile bicycle race from Adelaide to Sydney to be held next year for prizes amounting to more than \$10,000.

Receive Cancer Fund

New Haven, Conn.—Yale University received a large fund from anonymous donors to be used for investigation into the causes of origin of cancer.

EDMONTON, ALBERTA

The World of Wheat.

By H. G. L. Strange, Director Research Department,
Searle Grain Co. Ltd.

"The custodians of quality in Canadian
crops."

This would be an accurate description of
many of those important people and bodies
who together form the Canadian Seed Growers'
association.

The ability to market Canadian wheat, for
instance, on World's markets, and the price
premium which it usually commands, are the
results almost alone of that characteristic term-
ed "strength" or "quality."

Wheat quality, in turn, is a matter of high-
ly bred particular variety.

A highly bred particular variety is the pro-
duction of skilled, professional plant breeders.
But the precious small handfuls of seed which,
after years of labor and toil, the plant breeders
produce, would obviously be valueless if dis-
tributed to tens of thousands of farmers.

The members of Canadian 'Seed Growers'
association, with patient care and application,
and under the supervision of the association
itself and of many Government officials, multi-
ply these precious handfuls of seeds into thou-
sands of bushels which retain the same high
quality as the original handful, and then make
it all available to farmers at moderate prices.

The service thus rendered by members of
Canadian Seed Growers' association is not only
important, but can well be said to be a vital
necessity to Canadian agriculture.

Following factors have tended to raise
prices: Presence of black stem rust spores in
winter wheat belt in northern Texas, Oklahoma
and Kansas, and spring wheat area at Manden,
N. D. Rains badly needed in Canadian West.
Argentine corn and linseed rapidly going into
consumption abroad. Hungarian wheat esti-
mates below 1936: Heavy rains in U. S. South-
west cause widespread lodging.

Following factors have tended to lower
price: Decrease in Chinese wheat imports.
Prospects of large USA wheat crop. Favorable
development in USA Spring wheat belt. Con-
tinental buyers anticipate largest USA crop in
several years. Cuban pineapple crop large.
Good apple crop indicated in Nova Scotia.

Chemist Says Farmers Must Feed Lands

Farmers must feed their land, too, in addi-
tion to their livestock, so Dr. Howell Harris, of
the U. of B. C., said at the recent annual con-
vention in Vancouver of the Canadian Chemi-
cal associations.

Farmers, he said, who neglected to feed
the land to make minerals available to growing
crops, were harming the national health by re-
ducing the food value of their products. He
blamed some cases of rickets, goitre, anaemia,
and joint troubles to foodstuffs from soils that
were short of minerals.

THE YELLOW BRIAR

A Story of the Irish on the Canadian Countryside

By PATRICK SLATER

By arrangement with Thomas Allen, Publisher, Toronto.

CHAPTER VII.—Continued

"You are very backward, Paddy," he told me, "in your book learning. You are too talkative by far, and you are an annoyance to me in the school. I shall set you your tasks at home. You'd gain very little at the school, anyway. As well might I try coaxing the stars out of the sky into my hand, Paddy, as try pounding sense into those dunder-heads."

The first care of a boy like me, he told me, should be to think and speak his thoughts clearly in the simple words of the English tongue. And to do that, the boy must know what his words mean and be the master of many of them.

"I will have no gabble-guts about Whistling Hill," declared Old Hickory Mick. "Tighten up the belt of your tongue!"

The master put me under a rigid discipline; and had great patience with me because he knew I was trying desperately to please him. Ten new fresh words a day—to teach them by rolling them on my tongue, to pronounce them aright, to know their precise shades of meaning, and to use them freely and naturally in conversation—that was my daily task. The whole matter is clear to me now. The human brain cannot reason without words. A man cannot pasture even on his own thoughts save with the use of words. In a year's time, I could quote almost every statement made by Christ on earth. I was learning English grammar, not by committing stupid rules to memory, but by hearing the language correctly spoken. I could, in time, labor through the stilted, crabbed editorials in the semi-weekly Globe newspaper; though I preferred greatly the new story of Donkey & Son, which was printed as a serial when not crowded out by other stupid matters. While I was with Michael Hughes, I was carried on some way also into other things; and for a poor orphan boy, I have never felt that my education was sadly neglected.

"One does not get learning in a school for its own sweet sake," Michael told me one day, years afterward, as we were fishing in the creek for trout.

"All one gets there," he continued, "is merely the tools that enable the brain to work. Now I would have you observe," he told me, after a sharp look at his line, "that fishing for these little trout is a real education for any person, young or old. The fisherman, as you observe, gets a splendid training in patience and

perseverance. At the same time, the mind is getting a rest and is recreating itself. [Take ahold, you little devil!]" And such an education is practical, because its rewards become gross and palpable in the frying pan. [Quit wriggling, my little beauty!]"

"It is possible, Paddy," he told me, "for the human brain to be so crowded with facts and the trifling gear of knowledge that no space has been left there for sane thinking to be done. Some very learned men, Paddy, have brains like a jackdaw's nest."

And he may have had the soul of the matter in him.

"What is the use of much of this knowledge, anyway?" he asked me, as he disembowelled a fat, juicy worm.

"The end of knowledge is to get understanding; and the end of all such getting is to realize, Paddy, that a poor mortal here below can never really know anything surely. We live, lad, among shadows, and our lives are compounded of our feelings and our hopes."

His was a quaint and curious character. He was next and particular about his person; and for long spells, he would be very steady in his habits. For weeks at a time, the man's soul would romp like a laughing child on sunny hill-sides; and then suddenly it would betake itself out to lurk for days in gloomy caverns of dripping, chilling darkness. I got to know the signs that such a spell was coming on the man. First thing, he would go off his food. Then he would stride in and out the house and up and down the road as though the devil was at his heels. And the end of such an attack of the nerves was always a drunken spree at the tavern at Mono Mills.

The first of these excursions I saw, I took very much to heart. I met one of the Allen boys driving a bobsleigh up the townline.

"I see your Old Hickory is off on another treat," he told me.

"Wherever can the good man be?" I asked him.

"Oh! he's over laying down the law at Murphy's tavern."

"Whatever can have glamourised him?"

"Why Paddy," the young man told me, "he's as drunk as a lord and is holding open house."

So I put on a good fire at Whistling Hill; and trudged over to Mono Mills in the early evening to fetch the poor man home. In the sitting-room of the tavern, I found Michael Hughes and four other men conversing of the affairs of the world and drinking raw whiskey. They had got full enough to feel happy in a noisy way. They were passing through the secondary stage of a drunk in which every one present desires to pay for all the drinks. A fat little Cornish man, with side whiskers, was relaxing into the sentimental or tertiary stage. He had a grand reputation throughout the countryside as a barn framer, a shingle splitter and a booze artist. A man of such parts usually gives his wife a hard row to hoe; and the feelings of his children were hurt at the Mono school because of the little things they lacked. His small son, Harry, who lived to endow scholarship, proudly told us one day with a tear in his eye: "Ma says I'll get books when the 'uns lay'!"

With great depth of feeling that evening, his father was singing:

There is a tavern in our town,
In our town,
And there my sweetheart sits
him down,
as him down.

Michael Hughes, meanwhile, was delivering a learned discourse to the ceiling beams on the flight of a dung bug. One of the audience was making noises like a corncrier. They were all at the stage when gentlemen lose track of the passing of time.

I gave Michael a pluck on his coat

and asked him to come away home. "By the hole of my coat!" the man exclaimed, "here has come my conscience walking up and down, and to and fro, upon the earth. Get thee behind me, Satan!"

And then, lo and behold, the school teacher drifted into that weepy stage of loving kindness into which drink stews gentlemen at times. They become so soft and tenderhearted that their affections embrace the whole world; their hearts go out to their enemies; they think every woman delightfully pretty and they shed tears over the hurt feelings of a little dog. They moan and groan because nobody loves them.

Michael insisted on singing a song:

Whiskey! soul of revelry,
Low in the mud you sent me
Possessed with all your devilry,
I challenge thee to beat me.

Behold my coat to shreds is done,
My neck cloth down the wind has run—
But I'll forgive the deeds you've done,
If you to-morrow meet me!

What quarrels dire we both have had
This year of sorrow sabbie!
But oh, my bounding heart is glad
To see you crown the table.

Dear fondling of the nuptial nest,
My father kind, my mother blest,
My upper coat, my inner vest,
I'll hold you while I'm able!

Mr. Murphy, the tavern keeper, came in and spoke to me.

"Faith happy Paddy be, little lad, if you could get Old Hickory out of the place and keep him away from the tavern forever. But I know the man. He'll not budge out the door this night, unless he is thrown out. Run away home! The drink is already starting to gnaw at their innards; and they will soon be rough and quarrelsome."

One of the Irish kings from Adajala Township was busy singing Colleen Rue. Michael was insisting that the man shut up.

"Have some of his friends come for him in the morning," Mr. Murphy asked me, as I set off for home.

"It's a sick man they'll be finding!" Mr. Marshall sent the bobsleigh over next morning to bring Michael back to Whistling Hill. The groans of him were filling the whole tavern.

Hunched down 'n' ob, the man looked as weak as a wet rag. His face was chalky and dripping with clammy moisture. Mrs. Murphy was coaxing hot green tea into his rebellious stomach.

"Oh! God have mercy! Woman, I am a sick man! Oh, God, I am a sick woman!" he wailed, holding his pain-racked head, and retching without throwing up the rubbish.

"Yes! cry out, you scoundrel!" she scolded him. "Now, a hawking call always finds its mother first! Hear him cry!"

Poor Michael got a swallow of tea down him.

"And you will be up to your tricks again, too, Michael, Hughes," she warned him. "But don't be coming back here disgracing a respectable public house!"

We bundled Michael up and drove him home. Mrs. Murphy slipped me a small flask as we were leaving.

"Don't let him smell it or it will sicken the man entirely," said she. "But put a few drops into his tea on the side like, to-day; it will help to numb the gnawing of his innards."

It was a miserable time the man had while his body was purging itself of the poisons; and Michael always came out of a debauch with a humbled heart and a chastened spirit.

He consoled himself for a week afterward by reading the Georgics of old Virgilus Maro, and wearied me with the sound of them.

In the course of my duties at Whistling Hill, I got to know a lot about this business of whiskey drinking. I am not, of course, referring to the steady, sedate, daily drinking of hard liquor, which becomes a regular habit with many men, some of whom live to a great age and go to their graves as respected and successful members of their communities. A true history of the British Isles would demonstrate that every high office under the crown has been occupied, one time or another, by a gentleman who made a regular practice of consuming over twenty ounces of Scotch whiskey a day—generals in charge of armies in the field, judges of high appellate courts, prime ministers—it is necessary to name them? My concern was not with a man who took alcohol in such regular dosage that his body tolerated it as a food.

Michael Hughes was not a tippler.

The best
Safety Insurance
... a set of
Firestone TIRES
Firestone

Be sure you have good, safe tires on your car to protect yourself and loved ones. When it costs no more to have the best, put on Firestone tires—the kind which have been PROVED safest by the world's foremost racing drivers. Drive in to your local Firestone Dealer and let him equip your car now.

He never kept a drop of liquor about the house; and at ordinary times the very smell of it was unpleasant to his nostrils. The condition of his nerves seemed to create at intervals a craving which he fought for days, but which usually overcame him.

Like a journeyman barber of to-day, he usually held out till a Friday. And when he drank, he poured hard liquor down on the quivery and irritated nerves of a cross and empty stomach. A rebellion promptly broke out. In consequence, Michael Hughes was a drunkard; and in the end, he broke his neck by falling through an open trap-door in a tavern.

He would have come to a bad end at an earlier date had Mrs. Murphy not given me some sound advice.

"Keep him away from here as long as you can," she urged me. "When you see the fit coming on, dope a spoonful of brandy into his tea. That will give him a false appetite. Then feed him thick pease soup and put butter into it with a heavy

hand," the kind woman advised me. "A man with a good omelette of oil on his belly lining can drink a whole company under the table."

Which I still think was expert advice. And speaking of destructive and perverse habits and appetites, a fine young lady teacher in the same school section killed herself, years afterward, by eating sour pickles and chewing chalk.

(To Be Continued)

Bicycles are virtually a household necessity for young and old in Bermuda, where automobiles are banned.

The larger the mind, the more easily it is made up. 2209

BLACKHEADS
Blackheads go quickly by a simple method that just dissolves them. Get two ounces of proline powder from your druggist, rub this with a hot, wet cloth gently over the blackheads—and you will wonder where they have gone. Have a Hollywood complexion.

Cut Down Food Wastage
--- by covering all perishable goods with Para-Sani Heavy Waxed Paper. Para-Sani moisture-proof texture will keep them fresh until you are ready to use them.
You'll find the Para-Sani sanitary knife-edged carton handy. Or use "Centre Pull" Packs in sheet form for less exacting uses. At grocers, druggists, stationers.

GIN PILLS FOR THE KIDNEYS

Stony Plain and District.

Mr Walter Peters and Mr Bert Becker, Edmonton, were Stony visitors, on Sunday.

While working Monday, helping to paint the barn on the farm of Dairmont brotnera, in the Blueberry district, Mr John Miller had the misfortune to fall from the scaffold while reaching over to save a paint pot from spilling. He was taken to an Edmonton hospital for treatment.

A convention of the delegates from the Alberta and B.C. of the Missouri Lutheran Synod opened here yesterday. A service was held in the morning at St Matthew's church, Rev E Eberhart pastor. The delegates, both clerics and laymen, to the number of 80, will be in session for several days.

Mr Sam Zucht is expected home today, from an Edmonton hospital, where he has been for the past 10 days, receiving treatment for an injury to his hand.

Edmonton Exhibition tickets can be had from Mr. Larson, at the Royal Cafe.

BUTTER AND EGGS WANTED at The Royal Cafe.

The "Ban" on Trucks Modified.

In connection with the announcement of the highway traffic board on Friday that it has been decided to enforce the regulations concerning commercial trucks operating under the Public Services Act, it is intimated now that the "ban" on trucks carrying passengers without a permit applies to such commercial vehicles operating in competition with busses.

The statement concludes: "The whole purpose of the PSV Act is to prevent danger to life and limb by the indiscriminate, reckless truck passenger traffic, oftentimes by the use of vehicles not properly equipped to meet emergencies."

Hoppers Can't Stand Epsom Salt Diet.

Market Examiner; A short time ago The Examiner told about some United States grasshoppers that died after eating a poison mixture, in which Epsom salts was used instead of arsenic.

To see whether these were just "sissy" grasshoppers that "couldn't take it," District Agriculturist Langdon at Grand Forks, B.C., seeded 2 garden plots with bait—1 with arsenic, the other with the Epsom salts mixture. Dead hoppers were found on both plots.

At Kelowna they tried the Epsom salts mixture, but it failed to kill the hoppers—just made 'em weak.

SPORTS DAY AND PICNIC.

Holborn Hall, Mon., July 5th.

Baseball Tournament, Horse Racing Softball Tournament, Car Races Basketball, Horseshoe Tournament, Bicycle Races, Foot Races, Etc.

GOOD MUSIC ALL DAY.

Dance in Evening. You're Invited.

Notes of Sport.

At the League ball game here on June 23d. Onoway versus Stony, Onoway lost by the score of 3 runs to 5. The battery for Stony was Louie Miller and Otto Dreitz; Tony Dairmont umpire.

The League ball game here on Friday, Spruce Grove versus Stony Seniors resulted in a win for Grovers by 8 runs to 3. Grove battery: H Loeblich and C Brox. The Stony battery: Phil and EEnders and O Dreitz. The feature of the game was the incident when a visiting player came to bat out of turn. This act was protested. Fortunately, Prof. Wangsnoodle, the eminent baseball authority, was present, and settled the matter satisfactorily.

The bills are out for the Sports Day at Holborn on Monday, July 5th. Among the attractions advertised is horse racing.

Spruce Grove News.

A large party of young people from the Grove attended the Wiener Roast and dance up at Hubbel Beach on Saturday night.

Mr Otto Wudel was a Sunday visitor to his home up at Stony Plain.

Since the new spread of "gravel" was laid on Railway avenue, visiting motorists are re-naming the burg Rockville.

The basketball game here Friday night between the Edmonton West End Flashes and the Grove girls resulted in an easy win for the Grove's team, the score being around 60 points to 6.

Quite a number of the City's athletes have expressed their intention of competing in the games at the Grove's picnic on the 7th.

The strawberry social given Friday night by the Ladies' Aid of the United Church was well patronised, a number coming down from Stony for the affair.

On Tuesday last, the 29th, a tractor demonstration was given at the farm of Phil D Fuhr, 2 miles south of the Grove. It was under the auspices of Massey-Harris Implement Co., and proved very satisfactory to the large crowd which attended.

A number of the Grove's residents were surprised on Saturday when the rumor got around that the Grove's picnic had been postponed. It appears that some were offended when the ball game billed to be played on the Grove's Dust Bowl last Friday was moved up to Stony.

Donna fergit the Grove's big picnic next Wednesday, July 7. "The Duke" has been appointed in command of the Hotdawg Pavilion.

The Goebel Service Station has one of those new electric gasoline pumps installed.

On the Side.

"Nature is an original artist," we are told. Probably that's why she so often seems to copy the pictures on the flower-stem and petals.

—Lots of men are slaves to their money; but, then, it's known the world is full of emancipators.

—An exchange remarks that when a lady motorist holds out her hand, wiggles her finger and twists the wedding ring, it's a sign she's going home to lunch, and may turn her ear in either direction, at any time.

—In the old days, when we did our corresponding with the pen nib or quill, "P.S." stood for Postscript. Nowadays in sporting circles P.S. stands for Post & Sign.

—When they say "Spuds" you don't know whether they mean mushrooms or coffin-nails.

—College graduates have every right in the world to consider that the world is their oyster, as a Christian Science Monitor, just so long as they remember they graduated in a month that has no "r" in it.

—A Nova Scotia fisherman who fell overboard was knocked unconscious when he was hit by a life-belt. So many ideas for saving people end like this.

—Some people like to get a new car every year or two. Not so Wm Langbein of Memphis, Tenn. Bill bought a touring car with kerosene head and tail lights, had in 1909 and has her yet. Bill says "If I ever sell her, I'm going to get me a horse and buggy, as I did not like the new car."

—A dispatch states that at a wedding in Hungary 1 guest was killed, 5 wounded, and the bride seriously injured. As is so often the case, the groom was not even mentioned.

WITH CANOE AND PADDLE ON CANADA'S WATERWAYS

HANGE is the prime essence of a vacation and a canoe trip in Canada is one method by which the stress of daily life can be exchanged for a tranquil, carefree existence. It may be for a limited time only but its effects are felt all the year round. Jostling crowds, rumble of traffic, hot pavements and vitiated air have no place in the life of the canoeist.

A large number of interesting routes are outlined in "Canoe Trips in Canada," a booklet recently issued by the National Parks of Canada, Department of the Interior, Ottawa. Following the routes described there live the strenuous days of the voyager. There are cruises which lead for a hundred miles through canal, stream and lake with alternating civilization and lightly wooded flowing rivers and placid lakes on

which one can travel for days, and by contrast rushing streams which ever and again break into foaming rapids and thundering falls. There are adventurous trips through wilderness country along routes once followed by Indian and fur-trader, now almost forgotten so seldom are they travelled. Strange geological formations, wild life, good fishing, the charming and the picturesque await the advent of one's canoe on the numerous and varied water trails of Canada.

Earns High Post

R. G. McNeillie, widely known and popular Canadian Pacific Railway official, who on June 19 succeeds C. B. Foster as passenger traffic manager of the Company with headquarters in Montreal. Mr. Foster retires under the pension regulations after 46 years of service. Announcement of Mr. Foster's retirement and Mr. McNeillie's promotion was made by George Stephen, traffic vice-president of the Company.
